LIBRARY EXPLORER

New Acquisitions and News

Spring 2007

Update on Library Services

The Dental Library, located in Building 3005, Room 104, on South Campus, now houses over 200 dental monographs, many of which have been published since 2005. To see the list of books received since Fall 2006, go to [Recent Acquisitions](#) in this issue; previous new additions to the library collection since Katrina are listed in the [Summer 2006 Library Explorer](#).

Don't forget that the library also subscribes to electronic journals, databases, and books. All electronic (as well as print) books and journals are listed in the library catalog (Innopac) where you can find links to the online version. Databases are also listed in Innopac as well as in a comprehensive list of databases and search systems under [Electronic Resources](#). Until we return to the school in New Orleans, all access is remote or off-campus, requiring login with a library patron barcode and PIN. Contact the dental librarians if you need a barcode, have forgotten your PIN, or have any questions about using WAM.

PubMed Search Tips: Accessing Full-Text Articles

In order to search PubMed and see links to free full-text through LSUHSC library subscriptions, you must go to PubMed via links on the dental library homepage. One link is found under Databases and the other is located directly under the search box near the top of the page. These links take you to a screen where you then select on-campus or off-campus access. When you select off-campus, you next see the Web Access Management (WAM) screen, which requires login with your name, library patron barcode and PIN. After you complete your search in PubMed and retrieve a list of articles, click on the authors' names of your selected articles. You'll see one, two, or three icons below the journal title. The LSUHSC Libraries icon in the example below indicates that there is free full-text.

[Am J Orthod Dentofacial Orthop](#). 2007 Mar;131(3):301.e1-8.

[Related Ar](#)

Digital videographic measurement of tooth display and lip position in smiling and speech: reliability and clinical application.

[van der Geld PA](#), [Oosterveld P](#), [van Waas MA](#), [Kuipers-Jagtman AM](#).

Department of Orthodontics and Oral Biology and Cleft Palate Craniofacial Unit, Radboud University Nijmegen Medical Centre, Nijmegen, The Netherlands.
p.vd.geld@planet.nl

The two icons indicate that this article is available online. Click on either the publisher or the LSUHSC icon to link to the article.

1: [World J Orthod](#). 2007 Spring;8(1):72-9.

LSU Health Sciences Center
Print Collection

Improving the esthetic outcome of canine substitution for missing maxillary lateral incisors.

[Zachrisson BU](#).

PMID: 17373227 [PubMed - indexed for MEDLINE]

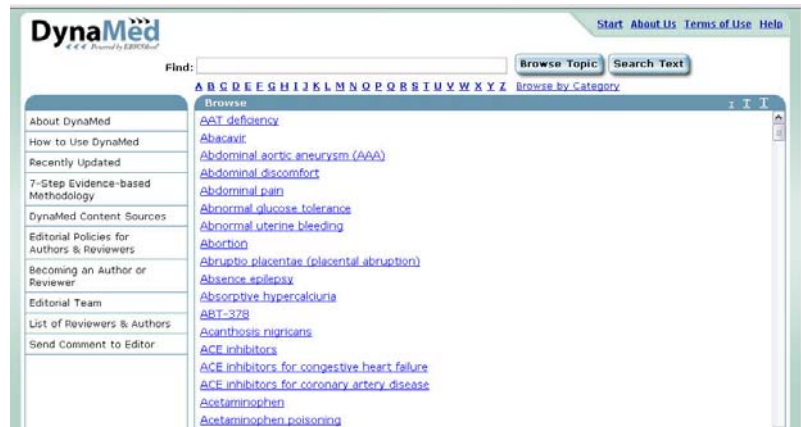

If you see the LSUHSC Libraries Print Collection icon by itself, free full-text is not available through PubMed. This icon will take you to the journal entry in the library catalog (Innopac) where you can check library holdings. **PubMed is not an authoritative record of our online subscriptions so you should check the Innopac record for the journal because you will often find a link to full-text here that does not appear in PubMed.**

New Database: Dynamed

The Library is pleased to present DynaMed, a point-of-care reference designed to provide health care practitioners with the best available evidence for clinical decision making. DynaMed provides clinically oriented summaries for nearly 2000 topics, diseases, and health care issues. The producers of DynaMed monitor the content of over 500 health sciences journals and evaluate the articles for clinical relevance and scientific validity. Through this systematic review of the literature, DynaMed presents the best available evidence to health care providers.

Each record includes complete disease information:

- Description / ICD-9 Codes
- Causes / Risk Factors
- Complications
- History / Physical Description
- Diagnosis / Prognosis
- Treatment
- Prevention / Screening
- References
- Patient Information

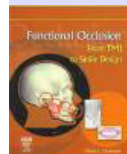

For easier access, you can download DynaMed onto a PDA. Please contact the Julie Schiavo for more information. You can link to DynaMed by clicking on "Electronic Resources" in the Databases column of the dental library homepage.

LSUSD Masters Theses

Since the inception of the Master of Science in Oral Biology program at LSUSD, 27 dental advanced education students have written theses and earned the MS degree. Although the Isché Library is the main depository for all LSUHSC theses and dissertations, the dental library tries to collect copies of theses by our graduates, and with the cooperation of students, program directors, and advisors, now has 17 titles in the collection. A [list of all dental theses](#), arranged by year and indicating if a copy is in the

dental library, can be found under Resources/Resource Guides on the dental library web page. You can also locate theses and dissertations in Innopac, the library catalog, by looking up the author or title.

Featured New Titles

Functional Occlusion: From TMJ to Smile Design, by Peter E. Dawson. St. Louis: Mosby/Elsevier; 2007, \$160.00.

The first publication by Peter Dawson since *Evaluation, Diagnosis, and Treatment of Occlusal Problems*, 1989, this volume presents the concepts taught at the Dawson Center for Advanced Dental Study. Dr. Dawson attempts to clarify misconceptions about the relationship between dental occlusion and the TMJ so that dentists can achieve the Pankey goal of a “high level of predictable success.” The contents of the book are divided into three parts, Functional Harmony, Dysfunction, and Treatment, and include numerous color diagrams and photos. Judging from the popularity of Dawson’s previous book, this one will not stay on the library shelves for long.

Evidence-Based Dentistry: an Introduction, Allan Hackshaw, Elizabeth Paul, Elizabeth Davenport.

Oxford: Blackwell Munksgaard; 2006, \$49.99.

Dentists have to be able to evaluate research articles and know how to find the best evidence for patient care. This text is a guide to interpreting published research, not a manual on how to do research in dentistry. The first chapter presents an overview of evidence-based dentistry; the last chapter discusses systematic reviews, including how to read and interpret them. In chapters 2-8, the authors incorporate published research articles to introduce basic statistical aspects of research and various types of study designs. This book, a comprehensive overview of how to evaluate and interpret research articles in dentistry, is a valuable resource for all dental students, faculty, and practitioners.

Recent Acquisitions

Circulating and Reserve Books

Moore, Keith L. **Essential clinical anatomy**. 3rd ed. Philadelphia: Lippincott Williams & Wilkins; 2007. (QS 4 M78e 2007)

Netter, Frank H. **Atlas of human anatomy**. 4th ed. Philadelphia: Saunders; 2006. (QS 17 N38a 2006) *with CD-ROM*

Cormack, David H. **Essential histology**. 2nd ed. Phila: Lippincott Williams & Wilkins; 2001. (QS 504 C81e 2001)
